Art Unit: 1724

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 7 are rejected under 35 U.S.C. 102(a) as being anticipated by Nau (U.S. Patent No. 6,057,161). The styrene divinylbenzene resin of the reference is identical to that disclosed by Applicant (see page 5, line 23 of the specification); and therefore, this reference material will inherently have the recited solubility parameter and affinity for endogenous cannabinoids.

Claims 1 and 3-7 are rejected under 35 U.S.C. 102(a) as being anticipated by EP 1 110 602. The reference material (see page 2, last 2 lines) is identical to that disclosed by Applicant, and will therefore inherently have the recited solubility parameter. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

Art Unit: 1724

Claims 1-4 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Fujimoto et al (U.S. Patent No. 3,625,652). The styrene divinylbenzene resin of the reference is identical to that disclosed by Applicant, and will therefore inherently have the recited solubility parameter and affinity for endogenous cannabinoids.

Claims 1-4 and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Abe et al (U.S. Patent No. 4,425,237). Abe et al discloses hydrophobic polymers of the type employed by Applicant (see page 5, lines 21-26 of the specification; and col. 3, lines 47-51 of the reference), and further discloses (see col. 3, lines 52-55) that these hydrophobic polymers will have a solubility parameter of 0 to 12.
